

TABLE OF CONTENTS

	<i>page</i>
CHAPTER 1 - INTRODUCTION	
SECTION 1. GENERAL	1-1
Purpose.....	1-1
Scope.....	1-1
Cooperation and Coordination	1-1
SECTION 2. JOINT SERVICE RESPONSIBILITY.....	1-1
Army	1-1
Navy	1-2
Air Force.....	1-2
SECTION 3. MAINTENANCE STANDARDS, POLICIES, AND CRITERIA	1-3
Standards.....	1-3
Engineering.....	1-3
Related Published Material.....	1-3
SECTION 4. TERMINOLOGY	1-4
Primary Considerations	1-4
Types of Structures	1-4
SECTION 5. PLANNING	1-9
Programming	1-9
Economic Requirement	1-9
Causes of Deterioration	1-9
Inspection.....	1-9
SECTION 6. PREPARATION FOR WORK.....	1-10
Field Measurements.....	1-10
As-Built Drawings	1-10
Sketches	1-10
Checking Structural Stability.....	1-10
SECTION 7. ACCESS TO WORK.....	1-10
Divers.....	1-10
Rafts and/or Barges.....	1-10

	page
Scaffolds	1-11
Ladders	1-11
Excavations.....	1-12
SECTION 8. SAFETY	1-12
Instructions.....	1-12
Personal Protection	1-12
Barricades and Safety Lines.....	1-13
Traffic Control	1-13
Protection from Mechanical Damage.....	1-13
Berthing.....	1-13
Currents	1-13
Changes in Tides.....	1-14
CHAPTER 2 - TIMBER STRUCTURES	
SECTION 1. PRESERVATION OF WOOD	2-1
Preservative Treatment.....	2-1
Wood Destroying Organisms.....	2-1
Preservative Materials.....	2-2
Pressure Treatment.....	2-4
Handling of Treated Wood.....	2-5
Seasoning Checks or Cracks.....	2-6
Hardware.....	2-6
SECTION 2. INSPECTION	2-6
Exposed Areas.....	2-6
Submerged Sections	2-7
SECTION 3. - MAINTENANCE	2-7
Replacement.....	2-7
Repair	2-12
CHAPTER 3 - CONCRETE STRUCTURES	
SECTION 1. CONCRETE TECHNOLOGY.....	3-1

	page
Definition of Concrete.....	3-1
Components of Concrete.....	3-1
Desirable Properties of Concrete	3-2
Special Concretes for Waterfront Structures.....	3-3
SECTION 2. CAUSES AND TYPES OF DETERIORATION.....	3-5
Causes of Concrete Deterioration.....	3-5
Types of Concrete Damage.....	3-6
SECTION 3. METHODS OF INSPECTION.....	3-6
Visual	3-6
Mechanical.....	3-7
Electronic	3-8
SECTION 4. REPAIR METHODS	3-8
Introduction	3-8
Dry-Pack Mortar	3-9
Cast-In-Place Concrete	3-10
Shotcrete.....	3-13
Prepacked Concrete.....	3-13
Tremie Concrete	3-14
Pumped Concrete	3-14
Epoxy Resin	3-15
Protective Coatings	3-16
CHAPTER 4 - STONE MASONRY STRUCTURES	
SECTION 1. INTRODUCTION.....	4-1
Background	4-1
Design.....	4-1
SECTION 2. METHOD OF INSPECTION	4-1
Visual	4-1
Settlement.....	4-1
Documentation.....	4-3

	page
SECTION 3. METHODS OF REPAIR	4-3
Engineering Investigation	4-3
Weep Holes	4-3
Shrinkage Cracks.....	4-3
Tuck-Pointing	4-3
Grouting	4-4
 CHAPTER 5 - RUBBLE-MOUND STRUCTURES	
SECTION 1. STRUCTURAL COMPONENTS	5-1
Mound.....	5-1
Rubble.....	5-1
Riprap	5-1
SECTION 2. CAUSES AND TYPES OF DETERIORATION.....	5-3
Types of Damage.....	5-3
Structural Damage	5-3
SECTION 3. INSPECTION	5-5
Components.....	5-5
Drainage	5-5
SECTION 4. METHODS OF REPAIR	5-5
As-Built Drawings.....	5-5
Replacing Components	5-5
 CHAPTER 6 - STRUCTURES INVOLVING SOIL	
SECTION 1. SOIL DESCRIPTION.....	6-1
Waterfront Use.....	6-1
Definition.....	6-1
Soil Classification.....	6-1
SECTION 2. SOIL PLACEMENT	6-2
Types of Soil	6-2
Compaction Control.....	6-2
Types of Compaction	6-3

	page
SECTION 3. INSPECTION	6-3
SECTION 4. REPAIR.....	6-3
Erosion.....	6-3
Sealing.....	6-4
Dewatering	6-4
Grouting	6-4
 CHAPTER 7 - STEEL STRUCTURES	
SECTION 1. CORROSION	7-1
Definition of Corrosion.....	7-1
Types of Marine Corrosion	7-1
SECTION 2. PROTECTIVE COATINGS	7-1
Protection.....	7-1
Surface Preparation	7-3
Recommended Coatings	7-3
Coating Application	7-3
Inspection of Coating.....	7-4
SECTION 3. CATHODIC PROTECTION.....	7-4
Definition.....	7-4
Types of Systems.....	7-4
SECTION 4. SUBSTITUTE MATERIALS FOR STEEL.....	7-5
Alloys	7-5
Plastics.....	7-6
Rubber	7-7
SECTION 5. INSPECTION	7-7
General Considerations	7-7
Inspection Techniques.....	7-7
Specific Structures	7-8
SECTION 6. MAINTENANCE OF STEEL STRUCTURES.....	7-15
Structural Considerations	7-15

	page
Piling.....	7-16
Supporting Components.....	7-19
Utility Lines.....	7-19
Mooring Fittings.....	7-20
Drydocks	7-20
Floating Structures	7-20
 CHAPTER 8 - PLASTIC AND ELASTOMERIC STRUCTURES	
 SECTION 1. TYPES OF MATERIALS.....	
Fiberglass- Reinforced Plastics	8-1
Foams.....	8-1
Rubbers.....	8-1
Plastic Wraps	8-1
Adhesives and Putties	8-4
 SECTION 2. CONSTRUCTION TECHNIQUES.....	
Lay-Up Construction.....	8-4
Spray-Up Construction	8-4
Filament Winding	8-4
Foaming In-Place	8-4
Pier Wrapping	8-4
Patching In-Place	8-4
 REFERENCES	 Reference-1
 GLOSSARY	 Glossary-1
Appendix A - Diver Inspection of Structures	A-1
Appendix B - Inspection, Documentation, Maintenance, and Certification of Graving Docks.....	B-1
 INDEX	 Index-1

FIGURES

No.		page
1-1	Open-type pier	1-5
1-2	Example of a wharf	1-5
1-3	Example of a dolphin	1-5
1-4	Graving dock with ship installed	1-6
1-5	Example of a marine railway	1-6
1-6	Example of a vertical lift drydock	1-6
1-7	A quaywall	1-7
1-8	Example of a mole	1-7
1-9	Example of a jetty	1-7
1-10	Example of the placement of a breakwater.....	1-8
1-11	A groin	1-8
1-12	Example of a seawall	1-8
2-1	Example of brown rot	2-1
2-2	Destruction of wooden piers by marine borers	2-2
2-3	Bankia (shipworm) infestation of wood planking	2-3
2-4	Surface of creosoted piling infested with Limnoria.....	2-3
2-5	Pier components	2-4
2-6	Fire-curtain wall.....	2-6
2-7	Wood pile replacement	2-8
2-8	Stringer splice	2-9
2-9	Repair of string piece	2-10
2-10	100% deterioration of chocks, lower wales, and fender piles	2-11
2-11	Replacing tops of piles	2-12
2-12	A flexible PVC barrier installed on wooden piles.....	2-13
2-13	Fender pile repair	2-14
3-1	Effect of water/cement ratio on 28-day compressive, flexural, and tensile strengths.....	3-3
3-2	Exposure zones	3-5
3-3	Concrete piles in advanced stage of deterioration	3-7
3-4	Sawtooth bit used to cut a slot for dry-packing	3-9
3-5	Excavation of irregular area of defective concrete where top of hole is cut at two levels.....	3-11
3-6	Details of forms for concrete replacement in bulkheads.....	3-12
3-7	Typical squeeze-type concrete pump	3-15
4-1	Masonry graving dock	4-2
4-2	Types of deterioration that will require repair	4-2
5-1	Concrete armor units.....	5-2
5-2	Cross section of semipermeable rubble-mound groin	5-4
5-3	Rubble-mound breakwater	5-4
5-4	Cave-in, indicating settlement of mole	5-6
5-5	The grouted sheathing of face of a breakwater, which is exposed to storms	5-7
7-1	Galvanic system of cathodic protection	7-5
7-2	Impressed current system of cathodic protection.....	7-5

FIGURES (continued)

No.		page
7-3	Typical example of corrosion damage to sheet piling	7-9
7-4	Hole in sheet piling causing soil subsidence	7-9
7-5	Example of utility line properly emplaced	7-9
7-6	Examples of mooring fittings	7-16
7-7	Repair of corroded steel pile.....	7-17
7-8	Concrete-protected steel sheet piling.....	7-18
7-9	Repairing tie rods.....	7-19
8-1	Fiberglass-reinforced plastic mooring buoy	8-2
8-2	Pontoon filled with urethane foam to impart buoyancy.....	8-2
8-3	Synthetic rubber molded into pile cap. Shape keeps birds from landing and snow from collecting.....	8-3
8-4	PVC barrier being installed around marine-borer-damaged pile.....	8-3
A-1	Cross section of piles with different damage ratings	A-5
B-1	Designation of drydock features	B-5

TABLES

3-1	Relationship Between Methods of Expressing Water-to- Cement Ratio	3-2
3-2	Gradation of Aggregates for Tremie Concrete	3-4
7-1	Types of Corrosion.....	7-2
7-2	Inspection Checkpoints for Utility Distribution Systems.....	7-10
A-1	Inspection of Specific Structures	A-3
B-1	Inspection Frequencies	B-6
B-2	Inspection Checkoff List	B-7
B-3	Coating Systems for Maintenance of Drydocking Facilities.....	B-17
